DELTA 66 dispensing	1828x600x631	160kg	230V/1300W	Adjustable	6 in cabinet	6	Type of identification

DELTA 66

FEATURES

- Low consumption water cooling unit, which allows dispensing water and soluble drinks at low temperatures.
- High adaptability in the selection of peripherals, thanks to the presence of 2 EVA-sized slots on the front of the machine.
- Photocells for detecting translucent or opaque containers: This system prevents product dispensing if the container is not correctly positioned or if the container is removed during the process.
- Possibility to mix several soluble products in the same dispensing, creating personalized recipes.
- Direct water output to the glass without passing through the mixers.
- Option for vending mode, with payment systems or dispensing, with type of identification.
- Water boiler that improves self-cleaning tasks.
- Articulated waste buoy, which allows better operation of removal and cleaning.
- Improved accessibility to the waste area to facilitate removal and cleaning.
- Filtered water to provide excellent product quality thanks to its BRITA filter.
- Configurable drink dispensing volume and dose.
- Dispensing of non-hygroscopic products.

DESIGN

Our DELTA 66 combines elegance and functionality in every detail. Its robust structure and high-quality materials ensure durability and superior performance. Additionally, the integration of advanced technology and an intuitive design provides a rewarding user experience.

- Keyboard with 18 physical keys, with global LED lighting and labels of 56x36 mm, allowing high visibility in any environment.
- Environmentally friendly design. The end customer provides their reusable opaque or translucent container of up to 0.5 liters and 266 mm in height, reducing generated waste.
- Product delivery area with removable stainless steel base and LED lighting available in red, green, or blue, allowing clear and attractive visibility of the dispensing process.
- Customizable front, adapting the design to the customer's needs.

OPTIONS

- Self-feeding water kit with bottle, which allows not depending on a water mains connection.
- Drain bypass kit, which simplifies maintenance tasks.
- The BRITA water filter that achieves high water quality. Jofemar payment systems (BT11, JF8, bank card reader) and user validation reader (J-140) or barcode reader.
- Possibility to control up to four additional Jofemar satellite machines.
- This provides an integrated and complete solution for cold soluble drinks and other products.
- Customize the image of the DELTA 66 with your brand identity.

PROGRAMMING

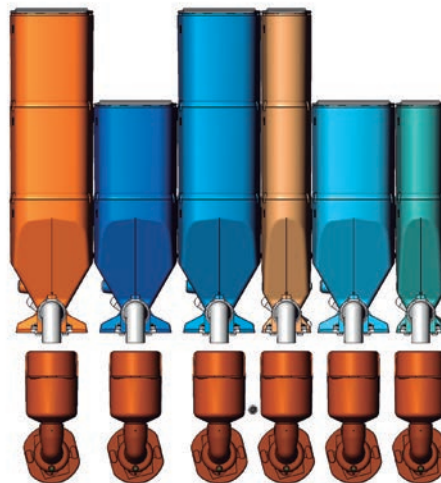

- Data extraction option with J-SUITE via J-LINK.
- Display with the ability to program the size of texts and images.
- Modification of prices, product doses in recipes, and many other options from the machine itself or from a USB flash drive.
- Possibility to assign multiple products to the same recipe, achieving personalized flavors.
- Extraction of accountancies and telemetry via DEX connector on the machine or, optionally, online using J-SUITE.
- Quick and easy updates using the USB port located behind the control module with integrated display.

SERVICE QUALITY

NON-HYGROSCOPIC PRODUCT

The product to be dispensed does not absorb moisture from the air, which means that even in humid environments, it maintains its consistency without alteration.

At Jofemar, we want to ensure that your products are suitable for use in the DELTA 66. Please send us the product so we can certify it.

QUALITY IN OUR FILTER

The BRITA filter improves water quality by removing impurities and providing a purer, more refreshing taste.

Benefits:

- Reduction of chlorine and heavy metals
- Improvement of water taste
- Prolongs the machine's lifespan

TELEMETRY

Our Jofemar electronic system **J-LINK** offers a wide range of functionalities to all our machines. One of them is the ability to use J-SUITE, our comprehensive and unified solution for machine management that allows you full control of the machine from anywhere in the world.

ADVANTAGES

- Compatibility with all Jofemar machines. You can use J-SUITE with all our products. Total stock control.
- Sending of technical and administrative alerts.
- Remote control of the machines from your computer, tablet, or mobile phone.
- Compatible with other payment systems.
- Option to have a closed-loop card reader.
- Compatible with non-Jofemar machines through standard protocols.
- Maximum data storage security.
- Automatic daily data backups.
- Full availability at any time.
- Access to sales statistics.
