

TAOS RANGE

TAOS RANGE

The Taos is a module designed to be integrated into satellite machines and centralize the entire purchasing process from a single point, creating more organized and efficient solutions.

Its mission is to coordinate several machines under the same interface, simplifying selection and payment and providing a more intuitive, faster and more complete experience for the user.

- Optimize the **user experience**, concentrating the entire purchase process in a single intuitive point.
- Facilitates the **management of modular solutions**, allowing multiple machines to operate in a coordinated and efficient.
- **Scalable**, allowing you to add or update identification and payment systems according to customer needs.
- **Ready for growth**, its architecture allows you to add up to 4 satellite machines or 4 lockers, interchangeable with each other, without the need to replace the module, expanding the capacity of the point of sale in a simple way and maintaining the same payment interface.
- **Shopping cart** to get multiple dispenses on our machines with a single payment.

TAOS BASIC V8

MACHINE	TAOS BASIC V8	DISPLAY	DISPLAY 4.3"
Measurement	1835x213x946	Screensaver	Image
Consumption	230V/14W	Product display	Optional
Weight	87 kg	Product sheet	No
Purchase method	Shopping cart via numeric keypad	Shopping cart	Yes
Reduced mobility height	Yes	Reduced mobility interface	No
Payment method	Wallet, card holder, card reader, QR	Price settings	Up to 4 price types

FEATURES

- Optimize the **user experience**, concentrating the entire purchase process in a single intuitive point.
- It facilitates the **management of modular solutions**, allowing several machines to operate in a coordinated and efficient manner.
- Accessibility for **people with reduced mobility** thanks to the heights of the payment systems.
- Options to add product images to enhance visualization.
- Advanced electronics that guarantee stable communication with satellite machines and reliable control of each transaction.
- Possibility of installing **different identification and payment systems**, such as wallets, wallets, QR readers or user identification, offering a versatile and accessible shopping experience.
- **Shopping cart** to get multiple dispenses on our machines with a single payment.

TAOS TOUCH V8

MACHINE	TAOS TOUCH V8	SCREEN	10.1" SCREEN
Measurement	1835x213x946	Screensaver	Image
Consumption	230V/30W	Product display	Optional
Weight	92 kg	Product sheet	Yes
Purchase method	Shopping cart through the screen	Shopping cart	Yes
Reduced mobility height	Yes	Reduced mobility interface	Yes
Payment method	Wallet, card holder, card reader, QR	Price settings	Up to 4 price types

FEATURES

- Optimize the **user experience**, concentrating the entire purchase process in a single intuitive point.
- It facilitates the **management of modular solutions**, allowing several machines to operate in a coordinated and efficient manner.
- Accessibility for **people with reduced mobility** thanks to the button on the screen that activates the controls to direct the navigation of the purchase.
- Options to add product images to enhance visualization.
- **Advanced electronics** that guarantee stable communication with satellite machines and reliable control of each transaction.
- Possibility of installing **different identification and payment systems**, such as wallets, wallets, QR readers or user identification, offering a versatile and accessible shopping experience.
- **Shopping cart** to get multiple dispenses on our machines with a single payment.
- 10.1" screen ensures greater visibility of products, information and other details.

TAOS 21 V2

MACHINE	TAOS 21 V2	SCREEN	21.5" SCREEN
Measurement	1827 x 460 x 953 / 1827 x 460 x 703	Screensaver	Image or video
Consumption	230V/50W	Product display	Yes
Weight	126 kg	Product sheet	Yes
Purchase method	Shopping cart through the screen	Shopping cart	Yes
Reduced mobility height	Yes	Reduced mobility interface	Yes
Payment method	Card reader, QR	Price settings	Up tp 4 price types

FEATURES

- Optimize the **user experience**, concentrating the entire purchase process in a single intuitive point.
- It facilitates the **management of modular solutions**, allowing several machines to operate in a coordinated and efficient manner.
- Accessibility for **people with reduced mobility** thanks to the button on the screen that activates the controls to direct the navigation of the purchase.
- Options to add product images to enhance visualization.
- **Advanced electronics** that guarantee stable communication with satellite machines and reliable control of each transaction.
- Possibility of installing **different identification systems**, such as QR readers or user identification, offering a versatile and accessible shopping experience.
- **Shopping cart** to get multiple dispenses on our machines with a single payment.
- 21.5" screen ensures greater visibility of products, information and other details.
- **Customization** option for customers both on the screensaver and with their corporate image.
- **Two cabinet options**, one 703mm deep for the Lockers[®] and another 953mm for the Vision and Qendra ranges.
- Telemetry, to keep track of dispensing, updates and implementation of images, among others.

TAOS 21 CASH V2

MACHINE	TAOS 21 CASH V2	SCREEN	21.5" SCREEN
Measurement	1827 x 460 x 953 / 1827 x 460 x 703	Screensaver	Image or video
Consumption	230V/50W	Product display	Yes
Weight	126 kg	Product sheet	Yes
Purchase method	Shopping cart through the screen	Shopping cart	Yes
Reduced mobility height	Yes	Reduced mobility interface	Yes
Payment method	Wallet, card holder, card reader, QR	Price settings	Up to 4 price types

FEATURES

- Optimize the **user experience**, concentrating the entire purchase process in a single intuitive point.
- It facilitates the **management of modular solutions**, allowing several machines to operate in a coordinated and efficient manner.
- Accessibility for **people with reduced mobility** thanks to the button on the screen that activates the controls to direct the navigation of the purchase.
- Options to add product images to enhance visualization.
- **Advanced electronics** that guarantee stable communication with satellite machines and reliable control of each transaction.
- Possibility of installing **different identification and payment systems**, such as wallets, wallets, QR readers or user identification, offering a versatile and accessible shopping experience.
- **Shopping cart** to get multiple dispenses on our machines with a single payment.
- 21.5" screen that guarantees greater visibility of the products, information and with the option of **customization** both on the screen-saver and with your corporate image.
- **Two cabinet options**, one 703mm deep for the Lockers° and another 953mm for the Vision and Qendra ranges.
- Telemetry, to keep track of dispensing, updates and implementation of images, among others.
- With integrated payment systems such as the wallet and 3 more slots.

TAOS FLY

MACHINE	TAOS FLY	SCREEN	10.1" SCREEN
Measurement	497x251x1138	Screensaver	Image
Consumption	12V / 1,5A	Product display	Optional
Weight	14 kg	Product sheet	Optional
Purchase method	Shopping cart through the screen	Shopping cart	Yes
Reduced mobility height	Optional	Reduced mobility interface	Yes
Payment method	Card holder or card reader or QR	Price settings	Up to 4 price types

FEATURES

- Optimize the **user experience**, concentrating the entire purchase process in a single intuitive point.
- It facilitates the **management of modular solutions**, allowing several machines to operate in a coordinated and efficient manner.
- Accessibility for **people with reduced mobility** thanks to the heights of the payment systems and the button on the screen that activates the controls to direct the navigation of the purchase.
- Options to add product images to enhance visualization.
- **Advanced electronics** that guarantee stable communication with satellite machines and reliable control of each transaction.
- Possibility of installing **different identification and payment systems**, such as wallets, wallets, QR readers or user identification, offering a versatile and accessible shopping experience.
- Integrated shopping cart to add multiple products and pay for them in a single transaction.
- Adaptable height with two different positions to meet universal accessibility requirements and regulations
- and electromagnetic closure with code opening for recharging the machine.
- 10.1" screen ensures greater visibility of products, information and other details.
- An EVA-type hole for the peripheral, as a bank card holder.
- Programming system using the touch screen itself.
- Possibility to control temperature and program expirations from JSuite.

TAOS MAX

MACHINE	TAOS MAX	SCREEN	15.6" SCREEN
Measurement	754 x 277 x 1124	Screensaver	Image or video
Consumption	12V / 3A	Product display	Yes
Weight	22 kg	Product sheet	Yes
Purchase method	Shopping cart through the screen	Shopping cart	Yes
Reduced mobility height	Optional	Reduced mobility interface	Yes
Payment method	Card holder, card reader or QR	Price settings	Up to 4 price types

FEATURES

- Optimize the **user experience**, concentrating the entire purchase process in a single intuitive point.
- It facilitates the **management of modular solutions**, allowing several machines to operate in a coordinated and efficient manner.
- Accessibility for **people with reduced mobility** thanks to the heights of the payment systems and the button on the screen that activates the controls to direct the navigation of the purchase.

TELEMETRY

Our Jofemar electronic system **J-LINK** offers a wide range of functionalities to all our machines. One of them is the ability to use **J-SUITE**, our comprehensive and unified solution for machine management that allows you full control of the machine from anywhere in the world.

ADVANTAGES

- Compatibility on all Jofemar machines. It is possible to use J-SUITE in all our products.
- Total stock control.
- Remote control of the machines from your computer, tablet or mobile.
- Compatible with other payment systems.
- Option to have a closed circuit card holder.
- Compatible with non-Jofemar machines through standard protocols.
- Efficiency in the management of accounting data.
- Technical and administrative alerts.
