

# T40/41

SELECTORES

Maximum  
coin recognition  
efficiency

The Jofemar T40 and T41 models are the most widely used for small coffee machines, recreational machines without prize and all types of devices that require a control of the services upon customer payment.

**FEATURES**

- 3.5" standard format
  - T40.** Front rejection channel and acceptance channel in the lower part.
  - T41.** Rejection and acceptance channels in the lower part.
- Diameter, alloy and anti-lead sensors that provide a reliable and precise analysis.
- Includes coin output IR sensors in the acceptance channel to guarantee that the coin has exited the selector before being validated.
- It has two electronic operation options: validator (classic, vending...) or totaliser (impulse, timer,...).
- Calibration, working mode, new coins, ect. updatable by computer.
- Four digit display control in the totaliser/timer option.

**ACCESSORIES**

- Front plate with recovery button.
